Coba's Capitol Comments

The special session of the Oregon legislature may be delayed until later in August as Congress is just now beginning to debate the key points in the next major stimulus bill. Already apparent is the disagreement between the Senate and House in the size of the package, continued unemployment benefits, and a number of other components. Oregon leaders had hoped to hold a special session the week of August 10 to make budgetary adjustments that included the new funds from Congress. As of now it looks to be delayed.

Governor Brown announced yesterday that schools will open statewide when certain health related metrics are met. This means that schools will begin online for the first few months and many think it will be the entire first semester if not the entire year.

COVID-19 has dramatically changed the way that candidates will run for office this year. Door to door, parades, fairs, and other large gatherings will not be key components to gaining name familiarity. Instead, social media will be the key means to connect with voters. This is a great year for ACEC members to reach out to your local legislators to introduce yourself and make a connection by inviting them to your office or for a socially distant cup of coffee.
